

## Storm Drain Fund

### Description

Storm drain fees were implemented by the City to fund the design, operation, and maintenance of the storm drain system, which includes monitoring for silt, toxic material and related pollutants. The Storm Water Department designs, operates, and maintains the storm drain system. Storm drain funding is used for the National Pollution and Discharge System (NPDES) Cooperative Agreement. The Water Department is reimbursed by storm drain revenue for billing and collecting of the storm drain fee on the water and sewer utility bills. A portion of storm drain revenue is also allocated to the Public Liability Claims Fund to cover storm drain-related public liability claims.
